

MPEGIF Logo Qualification Program

Ensuring Interoperability of MPEG Products and Technology

What is the Program and how does it work?

MPEGIF has the objective of establishing a thriving market for MPEG related products and services. To that end, MPEGIF has created a series of free self-certification programs to promote MPEG conformance and interoperability. The programs include:

- **Conformance Tier** provides a way for companies to gain the right to use the MPEGIF Logo on their qualified products and associated marketing material by completing a Declaration of Conformance.
- **Premium Conformance Tier** provides a way for products to be recognized at a higher level of MPEG conformance by self-testing on a series of industry-standard test streams.
- **Interoperability Program** provides a way for participating companies to work together to test and resolve interoperability issues before products go to market.

Completion of either the Conformance or Premium Conformance tiers provides companies access to the MP4 logo. Products that are qualified to use the MPEGIF Logo are also listed and promoted through the MPEGIF Qualified Products Directory which is accessible on-line.

For more information about the MPEGIF Logo Qualification Programs, please go to <http://logo.mpegif.org> or contact Nicola Wissler at nicola.wissler@mpegif.org

What are the benefits of the program?

-  Promote “MPEG-4 Brand Awareness”
-  Provide marketing value to participating companies
-  Sign of a quality-tested product
-  Encourage growth of the industry by building confidence that products will interoperate

MPEGIF Logo Qualification Program

Ensuring Interoperability of MPEG Products and Technology

Participating companies

Premium Conformance Tier

Samsung Electronics
Fraunhofer IIS
VSoft Technologies
MainConcept
Envivio
Bsoft
ARC International

Conformance Tier

Harmonic Inc
Motorola
Hantro Products
dicas
Nvidia
Silicon Image
CEVA
Media Tek
Sunplus Technologies
Sencore Inc
Human Monitoring Ltd
