

**Jeff McSchooler**  
**Vice President of Engineering / Digital Broadcast Centers**  
**EchoStar Broadcasting Corporation**

---

With over 25 years of experience in designing and sustaining engineering systems, Jeff McSchooler currently leads a team of 550+ EchoStar staff members, located at ten nationwide digital broadcast centers in the U.S., who are responsible for broadcasting over 5000 satellite television channels service-wide and overseeing the largest MPLS network in the world. Expanding technologies have seen his areas of responsibility continue to grow with the overseeing of the various components of Fixed Satellite Services, IPTV, VOD and incorporation of Sling Media technology as they so importantly relate to EchoStar's broadcast centers' development and customer support. Jeff's background in U.S. Air Force communications, years at Contel/GTE in Government Systems and Spacenet, made possible his being on the team responsible for the implementation of ground station requirements for the launching of DISH Network's DBS operations with the EchoStar I satellite in 1995. Jeff has been the recipient of numerous awards and commendations throughout his career including EchoStar's annual Chairman's Award.
