

Kamil A. Grajski, Ph.D. - President, FLO Forum / Vice President, Engineering, QUALCOMM

Dr. Kamil A. Grajski is focused on technology leadership, strategy and management to rapidly transition advanced research and development results into commercial products, systems and solutions for the mobile broadcast and mobile broadband access industries.

Kamil is President of the FLO Forum, www.floforum.org.

Kamil previously held positions as VP, Engineering and VP & General Manager of the QUALCOMM SnapTrack division which focused on the global commercialization of Assisted-GPS technology and services, including Wireless E-911, resulting in over 150 million AGPS-enabled chips shipped worldwide to date.

Kamil earned his doctorate in Biophysics at UC Berkeley and his BA in computer science at New York University.
