

David Cole, CEO IPV

Dave joined IPV in February 1997 to lead the Company's highly acclaimed technical team, the world leaders in working with low bit-rate video and audio over IP networks. Dave became CEO in late 2004 and continues to contribute to and drive IPV's innovative products.

His professional career started at a Philips broadcast division in 1975, as part of a team leading the field of television graphics, noise reduction and special effects. Later, Dave was at Rank Cintel and responsible for a multi-million pound R&D budget producing products such as URSA and C-Reality. Dave has a solid track record of establishing highly successful design teams and R&D operations pioneering in the fields of electron beam scanning, DMD cinema projection, Telecine, digital cell animation, native resolution film scanning, Browse and hierarchical encoding;.

While successfully managing and developing commercial and technical partnerships, Dave takes a keen interest in industry trends and emerging technologies, particularly through his links with BKSTS and SMPTE.
