

MPEGIF Logo Qualification Program

Ensuring Interoperability of MPEG Products and Technology

What is the Program and how does it work?

MPEGIF has the objective of establishing a thriving market for MPEG related products and services. To that end, MPEGIF has created a series of free self-certification programs to promote MPEG conformance and interoperability.

- **The Conformance Tier** provides a way for companies to gain the right to use the MPEGIF Logo on their qualified products and associated marketing material by completing a Declaration of Conformance
- **The Premium Conformance Tier** provides a way for products to be recognized at a higher level of MPEG conformance by self-testing on a series of industry-standard test streams.
- **The Interoperability Tier** provides a way for participating companies to work together to test and resolve interoperability issues before products go to market.

Completion of the Conformance or Premium Conformance tiers provides participating companies access to the MP4 logo and promotion in the MPEGIF Qualified Products Directory.

For more information about the Logo Qualification Programs, please contact Nicola Wissler at nicola.wissler@mpegif.org

What are the benefits of the program?

-  Promote “MPEG-4 Brand Awareness”
-  Provide marketing value to participating companies
-  Provide the sign of a quality-tested product
-  Encourage growth of the industry by building confidence that products will interoperate

MPEGIF Logo Qualification Program Participants

Premium Conformance Tier Participants

Samsung Electronics
Fraunhofer IIS
VSS
MainConcept
Envivio
Bsoft
ARC International
Amino Communications
2wire

Conformance Tier Participants

Harmonic Inc
Motorola
Hantro Products
Elecard Devices
dicas
Nvidia
Silicon Image
CEVA
Media Tek
Sunplus Technologies
Sencore Inc
Human Monitoring Ltd
Scopus Video
Freescale Semiconductors
Elecard
